North Carolina's March County and Area Employment Figures Released

RALEIGH — Unemployment rates (not seasonally adjusted) decreased in 99 of North Carolina's counties in March and remained the same in one. All 14 of the State's metro areas experienced rate decreases.

Graham County had the highest unemployment rate at 17.8 percent while Orange County had the lowest at 5.6 percent. Among the Metro areas, Rocky Mount at 12.5 percent experienced the highest rate and Durham-Chapel Hill at 6.7 percent had the lowest. The March not seasonally adjusted statewide rate was 8.9 percent.

	Counties With Rates 5% Or Below	Counties With Rates Between 5% & 10%	Counties With Rates 10% Or Above
March	0	56	44
February (Revised)	0	40	60

When compared to the same month last year, not seasonally adjusted unemployment rates fell in 78 counties, increased in 14 and remained unchanged in eight. Twelve metro areas experienced rate decreases, while one experienced an increase and one remained the same.

The number of workers employed statewide (not seasonally adjusted) increased in March by 17,248 to 4,273,673, while those unemployed fell 26,855 to 419,546. Since March 2012, the number of workers employed statewide increased 32,155, while those unemployed decreased 22,262.

It is important to note that employment estimates are subject to large seasonal patterns; therefore, it is advisable to focus on over-the-year changes in the not seasonally adjusted estimates.

The statewide unemployment rate release for *April 2013* is scheduled for *Friday, May 17, 2013*.

Local Area Unemployment Statistics (LAUS) Annual Revisions

Monthly labor force statistics for the state and substate areas are revised by the Bureau of Labor Statistics (BLS) through the annual revision process. This updates the historical monthly labor force statistics to reflect revised population controls; seasonal factors, employment estimates, and unemployment insurance claims. The annual revisions are a standard part of the estimation process and take place this same time every year in each state nationwide. Both seasonally adjusted and not seasonally adjusted data are subject to revisions back to 2008.

Starting with the January 2013 national labor force statistics, BLS incorporated population controls that reflect the Census population estimates for 2012. BLS did not revise historical data based on the new population controls; therefore, labor force statistics for January 2013 are not directly comparable with the figures for December 2012 or earlier periods.

Current Employment Statistics (CES) Benchmarking

Monthly Nonfarm payroll employment estimates for the state and substate areas are also subject to annual revisions required by the BLS. The employment estimates are adjusted through a process that overlays these sample-based estimates with actual employment data from the Quarterly Census of Employment and Wages program that has been adjusted to reflect CES employment definitions. The seasonally adjusted and not seasonally adjusted series are subject to revisions from 1990 forward.

The 2013 Release Schedule is also available online at: http://www.ncesc1.com/pmi/rates/PressReleases/NC_Release_Dates_2013.pdf

NORTH CAROLINA COUNTY LABOR MARKET CONDITIONS MARCH 2013

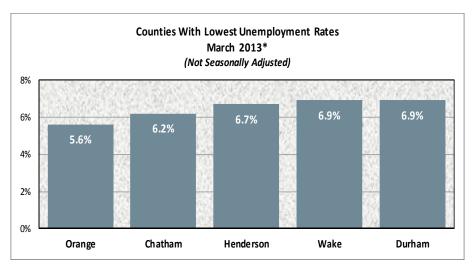

North Carolina's statewide unemployment rate (not seasonally adjusted) was 8.9 percent in March. This was a 0.6 of a percentage-point decrease from February's revised rate of 9.5 percent, and a 0.5 percentage-point decline over the year.

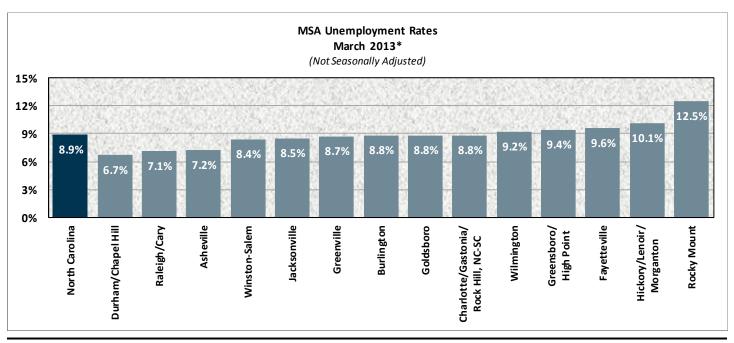

Over the month, the unemployment rate decreased in 99 counties, with the exception of Wilson County, which remained unchanged. Thirty-six counties had unemployment rates at or below the state's 8.9 percent rate.

Graham County recorded March's highest unemployment rate at 17.8 percent, decreasing 2.3 percentage points from the previous month. Swain County had the second-highest rate at 16.7 percent. Orange County had the lowest unemployment rate at 5.6 percent, followed by Chatham at 6.2 percent.

Unemployment rates decreased in all 14 of the state's Metropolitan Statistical Areas (MSAs). The Rocky Mount MSA had the highest unemployment rate in March at 12.5 percent. Durham/Chapel Hill reported the month's lowest unemployment rate at 6.7 percent, which decreased 0.3 of a percentage point from the previous month. Raleigh/Cary followed at 7.1 percent.

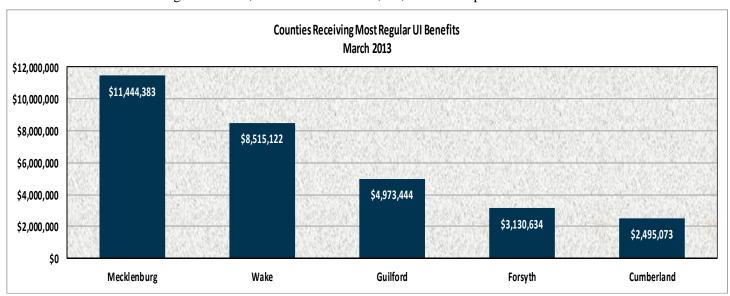

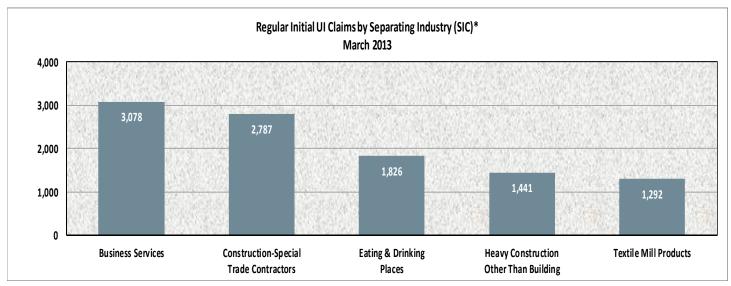

In March 2013, there were 44,155 Regular Unemployment Insurance (UI) Initial Claims filed in North Carolina. Counties with the largest number of claims filed and benefits received are shown in the graphs.

Total Regular Initial Claims are based on the number of transactions; demographic data are counts of individuals. Not all race/ethnicity and age breakouts are presented, but are available upon request.

	Reg	ular Initial U	JI Claims	, March 201.	3				
	Trans	sactions		Individuals					
County	Initial Claims	Attached To Payroll	Female	African- American	White	45 Or Older			
Mecklenburg	3,575	729	1,703	1,927	1,080	1,142			
Wake	2,541	603	1,134	1,027	1,102	983			
Guilford	2,468	1,117	1,092	1,280	819	955			
Forsyth	1,610	714	672	638	584	614			
Davidson	1,242	850	402	184	752	540			

New Regular Initial Claims, totaling 25,106 for the month ending March 2013, decreased 3,549 from the prior month. Sixteen percent were Attached New Initial Claims. During the same period a year ago, New Claims totaled 28,265, of which 18 percent were Attached. For the month ending March 2011, New Claims totaled 33,203, of which 20 percent were Attached Claims.

^{*}Many Initial Claims were nonclassifiable by separating industry.
